CAREER PROFILE

Computer Science and Engineering student with hands-on experience building and deploying Flask web applications. Interested in Web Development, Python/Flask, Software Development, Frontend Development, and AI/ML internships. Comfortable working across Python, JavaScript, SQL, and core programming languages; currently developing practical ML and DSA skills.

TECHNICAL SKILLS

Programming: C, C++, Java (independent use); Python (project building)
Web: HTML, CSS, JavaScript, Flask (project building)
Database & tools: SQL, MySQL (project building); Git/GitHub (independent use); Canva and Excel (basic)
Currently learning: Data Structures & Algorithms, Machine Learning

PROJECTS

Apartment Maintenance Management App | Python, Flask, HTML, CSS, JavaScript, SQL/MySQL

Built and deployed an apartment maintenance app for tracking maintenance amounts and expenses by category. Includes admin and resident user logins, a dashboard with charts, and PDF/Excel report exports. Developed with substantial use of AI/no-code tools.

SubadrNari - Women's Safety App | Python, Flask, HTML, CSS, JavaScript

Collaborated with a team to build and deploy a women's safety app. Features include an SOS interface, emergency contact access, unsafe-area reporting, and a map interface for viewing safe routes.

AI-Based Recipe Recommendation System (In Progress) | Python, Machine Learning

Team project in planning to recommend recipes from entered ingredients and from an uploaded food/ingredient image. Model and dataset selection are in progress; YOLO11 and KNN are proposed options, and implementation has not started.

EDUCATION

B.E. Computer Science and Engineering | MVJ College of Engineering

5th semester | Current CGPA: 8.07/10 | Expected graduation: 2028 | No backlogs

PUC (PCMC), St. Joseph's Indian Composite PU College | 80.5% | Karnataka State Board

SSLC, SSB English High School | 92.96% | Karnataka State Board

ADDITIONAL INFORMATION

Languages: English, Kannada, Tamil | **Experience:** No formal internship yet
